

FATHALLAH SAIED ABOU EID

Junior Data Analyst | HR Operations & Data Management Specialist

Menoufia, Egypt (Relocatable / Remote) • +20 103 736 8956 • fathallahsaed352@gmail.com • [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Educational Technology graduate specializing in Data Analytics, Data Cleaning, Modeling, and Visualization. Proficient in SQL, Power BI, Advanced Excel, and Power Query, with hands-on experience building end-to-end analytics projects across HR and e-commerce data. Seeking an entry-level Data Analyst role to apply analytical precision and technical skill toward actionable, data-driven business insights.

TECHNICAL & ANALYTICAL SKILLS

Data Analytics & Tools: SQL, Advanced Excel, Power Query, Power BI, Data Cleaning, Data Validation, Star Schema Modeling

Advanced Excel Functions: XLOOKUP, SUMIFS, COUNTIFS, FILTER, INDEX/MATCH, Dynamic Arrays, PivotTables & Charts

Visualization & BI: Interactive Dashboard Design, KPI Tracking, Trend Analysis, Business Intelligence Reporting

Domain Knowledge: Sales Performance Analysis, HR Data Operations, Payroll & Attendance Modeling, Database Entry

Soft Skills: Analytical Thinking, Attention to Detail, Problem Solving, Data Integrity, Communication

PRACTICAL ANALYTICS & DATA PROJECTS

E-Commerce SQL & Geo-Spatial Analytics (Brazilian Olist Dataset)

[GitHub Repository](#)

- Analyzed an 8-table relational e-commerce dataset (99,441 orders) using SQL, including multi-table joins, correlated subqueries, and window functions.
- Extended the analysis with a geo-spatial phase: reduced a 1M-row coordinate table by 98%, implemented the Haversine formula manually in SQL to calculate real shipping distances, and tested whether distance affects delivery delay.
- Built a live two-page Power BI dashboard (ODBC-connected) with delay-colored maps and a shipping cost analysis, uncovering that only 7.9% of orders are actually delayed despite an early average delivery time.

HR Workforce Analytics (SQL & Power BI)

[GitHub Repository](#)

- Analyzed a 3-table relational HR dataset (1,562 employees) using SQL, covering data validation, joins, self-joins, CTEs, and window functions.
- Decoded undocumented action codes through statistical pattern analysis rather than assumption, confirming a hire code and three termination-related codes that together account for all 444 terminations.
- Built a live two-page Power BI dashboard connected directly to the SQL database via ODBC, featuring DAX-based KPIs, department-level attrition analysis, and a performance ranking measure replicating the SQL RANK() logic.

Sales Performance & Profitability Analytics (Power BI)

[GitHub Repository](#)

- Developed an end-to-end business intelligence solution translating raw ERP data into an interactive two-page Power BI dashboard for executive decision-making.
- Evaluated sales performance, profit margins, regional target achievement, and product-level efficiency to surface actionable strategic insights.
- Modeled and transformed ERP data to support accurate, drill-down-ready reporting across regions and product lines.

Advanced Sales Performance & Analytics Dashboard (Excel)

- Cleaned and transformed raw, multi-source sales datasets using Power Query and Excel, resolving missing records and standardizing inconsistent formats.
- Designed a relational Star Schema and built a dynamic dashboard using PivotTables, SUMIFS, and XLOOKUP to track revenue trends and KPIs.

HR Operations & Payroll Analytics System

[GitHub Repository](#)

- Architected a multi-sheet, automated HR workbook covering employee master data, attendance logs, leave balances, and salary frameworks.
- Implemented XLOOKUP, dynamic FILTER, and data validation rules to automate error logging, overtime tracking, and payroll calculations.

EDUCATION

Bachelor's Degree in Educational Technology

Faculty of Specific Education — Menoufia University | Graduated May 2025

Coursework focused on computer systems, information technology, database fundamentals, and instructional systems design — providing a strong technical foundation for data-focused roles.
